

My name is Chloe. I am a year 1 animation student. Coming to uni as a mature student with children terrified me but after attending a mature student community circle session I realised that I'm not the only one. As student officer, I would like to encourage more support within our community. Many of us have jobs, family's and other responsibilities which make our journey at the university more challenging. Having people you can relate to is a big help here at the university. I hope to hear from you about your experiences and what you think would be helpful. I am excited to meet and support more of you.
