

A Space for Students - Making a Lounge/Bar a Reality

The SU can, now, realistically consider making a dedicated student lounge/bar happen. A space run by students, for students. I'll ensure we move from discussion to action, bringing everyone's voice into how it's designed and managed.

Championing Mature Student Visibility

As a mature student, I understand the barriers we face; commuting, family life, and financial strain. I'll secure regular meetups, a dedicated mature student exhibition, and visible representation across campus life so no one feels isolated.

Recognising the Cost of Living Impact

Many students balance jobs with study, but how much is that affecting your success? I'll launch a survey on student working hours and their impact on study time, using real data to push the University to adapt teaching practices and provide better support.

A designated lost property area

How many students have lost something in University? This topic has been raised many times by student reps, to create a designated lost property area. I will ensure this happens.

Together, we can continue to build an inclusive, visible, and supportive student community, one that listens deeply, acts with care and shapes change.

Janet Chase for SU president of Education and Representation
