

HELLO!

Hello! My name is Aurelie Simon, preferably known as Lilli.

I am a first year undergraduate animation student and I am running for a Undergraduate Student Officer role. As a older undergraduate, I have gathered experience for public speaking in a educational setting. I am passionate for what I stand for and, with the rise of generative AI within the creative industry, I want to use this moment to speak up for students affected by this.

Goals?

- Speaking up against generative AI and educating students of the unethical practices within data centres.
- Paid work placements and volunteer jobs to better chances of future jobs.
- Foster unity, positive change and collaboration.

To achieve these goals, I will use the public speaking and leadership skills used during my time as an animation teacher in sixth form, running animation projects for years, charity commissioner for single and/or abused men and fathers and a exhibition designer and assistant during my time in college.

Due to my long experiences, this has caused me to be more open minded to feedback and criticism, willing to hear all sides

THANK YOU
